

An audit of the quality and outcomes of care experienced by the dying person and those important to them during the last admission leading to death in acute, community hospitals and mental health inpatient providers.

National data collection

This Trust is involved in a national project to help understand what is being done well and where improvement is needed.

From **1 May to 31st October**, we will be collecting data from families and others via a web-based survey form. The legal basis for this data collection is explicit consent.

This project is called the **National Audit of Care at the End of Life (NACEL)**.

For more information about participation, or to see the 2018/19 audit results please visit NACEL's website
