

## **Roger Weddell – Staff Governor for Clinical Support: Election Statement**

**Why would you like to be a governor?**

I would like to offer my nomination to the role of Staff Governor within the Clinical Support Constituency as I feel it would be a progressive step in my development within the Trust and the wider NHS, supporting my career goals and aspirations of further development within the senior structure of the Physiotherapy Service, South Warwickshire NHS Foundation Trust and the wider NHS as a whole. I have been part of the SWFT 'family' since re-joining the trust in 2010 as a Clinical Team Lead Physiotherapist within the Support Service Directorate across the Trusts MSK Outpatient Departments and more recently as an Advanced Clinical Practitioner/First Contact Practitioner (FCP) within SWIMS and PCN East GP Surgeries. I feel I possess the qualities desired within the Trust as a leader firstly being Team orientated, Engaging, Passionate about improvement, development and innovation but also focussed on our communities and organisational boundaries to deliver the best services afforded to us. This has been highlighted as part of my role over the last 2 years within the implementation and development of the FCP service across South Warwickshire. But most importantly I feel I possess the attributes, standards and values that this role encompasses both personally and clinically to support staff and patients alike and champion services within the Trust, support patient and staff access and understanding across these areas ensuring that our Hospital and Trust remains outstanding in its performance and name.
