

Care received by patients with Chronic Obstructive Pulmonary Disease (COPD): **National data collection**

This hospital is involved in a national project to help make the care of patients with COPD better.

From **1 February 2017**, we will be collecting information about all patients admitted to this hospital with a COPD flare-up (exacerbation) and the care they receive. This includes confidential information.

This information will be used to help improve COPD care for patients.

This project is called the **National Asthma and Chronic Obstructive Pulmonary Disease (COPD) Audit Programme (NACAP)**.

For more information about participation or how to opt-out of the audit, please ask a member of the hospital COPD team for a leaflet.
